Highlights

Poster Winners

Last October, EARTHDAY.ORG, invited students across the US to visualize our theme for Earth Day 2024, Planet vs. Plastics. We have the great honor of announcing our two exceptional winners. Luke, won the 5-17 age category while Teague won the 18+ category. Congratulations to everyone who entered and thank you for supporting EARTHDAY.ORG with your wonderful creativity

Luke P.B.

Teague S.

Highlights

It's Our Future

a group of youth advocates, who are taking action against for sustainable change

It's Our Future (IOF) is the youth program of Seven Generations Ahead, a Chicago area non-profit that supports sustainable communities and just climate solutions. IOF empowers students at over ten Chicagoland high schools to work together towards climate justice in their schools and communities.

Students at UN Climate Change Conference

Several of these passionate young people have attended UN Climate Summits (COPs) where some presented on topics as Climate Literacy as Climate Justice, and Anxiety, Apathy and Action: Youth Mental Health in the Face of Climate Disaster. They have leveraged their COP experience to successfully push for comprehensive climate policies, including climate education in their schools.

It's Our Future students began working on Earth Day efforts in their schools such as waste audits, anti-plastics campaigns and zero waste lunches.

IOF have met with State Representatives and other policy experts to ensure that an appropriate bill is passed to insure that all Illinois students get a foundational climate education.
