

Lesson Plan: Nature Trail I Spy...

Subject: Content/Social Sciences

Grade Level: Elementary School (K-2nd)

Time : 30 minutes

Objective: Students will *identify* objects in nature and *describe* their color

1. Introduction (10 minutes):

Discuss with students colors and what connection they make to that color. What objects do they think of when they hear that color?

2. Activity: Nature walk (15 minutes):

Together, take students on a nature walk around the school. If students are not able to go on a nature walk, you can use a picture of a local park, community, etc.

Students will use their recording sheet to match a color with something that is that color on the walk or in the picture

3. Conclusion (5 minutes):

Bring students back to the classroom. Use slides and/or student recording sheets to talk about what they found. Ask students what color did they see the most? What color did they see the least?
