

Pete Buttigieg as Transportation Secretary has been a frequent messenger for the administration's broader climate agenda, emphasizing the role of transportation in contributing to climate change and the sector's potential as a solution. [Read More](#)

Biden Seeks 2035 Ban on Single-Use Plastic in Federal Government

The Biden administration is undertaking a multi-agency effort to phase out single-use plastics from federal operations by 2035, with another target to end its use from food service operations, events, and packaging purchased by the federal government by 2027.

But the plans may be upended if Donald Trump wins back the White House in November. More than 90% of plastic is derived from fossil fuels, and Trump has pledged to significantly ramp up domestic oil and gas production if he's re-elected.

The framework, released on Friday, is the first time the federal government has formally acknowledged the severity of the plastic pollution crisis. "It has become clear that the reliance on plastic across the globe and in all economic sectors has a serious cost to public health and the environment that requires action," said the report, written by an interagency task force on plastic pollution and the circular economy led by Brenda Mallory, head of the White House Council on Environmental Quality, and national climate adviser Ali Zaidi. EPA Awards \$4 Billion in Climate Funds for Emissions Reductions

The Biden administration on Monday will announce it's awarding more than \$4.3 billion to fund climate projects across the nation.

California's AI Power Needs Conflict With Pledge to Cut Emissions

The artificial intelligence boom that has bolstered California's economic fortunes also threatens to undo some of the state's environmental goals as the need for new computing power demands more energy.

Endangered Species Protections Draw New Legal Focus Post-Chevron

Lawyers and analysts are bracing for legal battles over every aspect of the Endangered Species Act in a post-*Chevron* world, but the spirit and letter of the law could insulate endangered species protections from being gutted by future administrations.

[Contractor Climate Rules Stall as Agencies Target Fall Draft](#)

The Biden administration has again extended its timeline for finishing emissions reporting requirements and other climate disclosures for federal contractors, delaying the release of a draft of the final rules from the summer to the fall.

[Power Plant Rule Challengers Lose Bid to Halt Carbon Limits](#)

A panel at the US Court of Appeals for the District of Columbia Circuit ruled Friday that it won't temporarily halt contested power plant emissions standards while litigation carries on over its legality.

[EPA Loses Bid to Stall Texas Suit Over Ozone Standards Plans](#)

The Fifth Circuit on Friday denied the Environmental Protection Agency's effort to pause Texas's lawsuit challenging a ruling that the state failed to submit implementation plans for areas that fell short of federal ozone standards.

[National PFAS Class Action Refiled, to Stay in District Court](#)

A revised class action that seeks information about the health effects of two PFAS will remain in the federal district court that partly granted the plaintiff's request in 2022.

[Carbon Capture Industry Set for New Regulation With Illinois Law](#)

Illinois Gov. J.B. Pritzker (D) signed into law new development and monitoring guidelines for carbon capture and sequestration projects, a move to incentivize investment in the state while propping up environmental protections.
