

# EARTH DAY SHOWCASE SNAPSHOT **TIPS**

Please read the showcase snapshot requirements for submitting pictures of student work. Submissions are due by **April 26th, 2025 at 5pm EST.**

## What To Do:

- Submit high-quality images that showcase your students engaging in projects related to one of the four topics introduced: Plastics, Fast Fashion, Renewable Energy, and Foodprints.
- Ensure images are at least 1920×1080 pixels in resolution and have a file size between 2–10 MB in JPEG or PNG format.
- Use a collage format that includes a minimum of two images illustrating the project's progress from start to finish.
- Utilize the fact sheets and Earth Day Showcase Lesson Slides as resources to guide your students' projects.

## What **NOT** To Do:

- Avoid submitting images that do not pertain to the four showcase topics (Plastics, Fast Fashion, Renewable Energy, and Foodprints).
- Do not submit only the final project results without visual representation of student participation.
- Refrain from submitting pictures that lack project context; we aim to highlight your students' engagement with the project themes.
